

## MANUFACTURER LIST

### GAS DETECTORS RESIDENTIAL AND RECREATIONAL VEHICLES LISTED BY UNDERWRITERS LABORATORIES

Gas detectors are intended to detect natural gas (methane) and LP-Gas (propane), which may be present in a residential building or in recreational vehicles. These devices are intended to sound an alarm at or below 25 percent of the lower flammable limit of natural gas or LP-Gas. The basic standard used to investigate products in this category is UL1484, "Residential Gas Detectors".

---

*Disclaimer: The American Gas Association provides this list for the convenience of its members and their consumers. The list contains the names, addresses and contact information for gas detector manufacturers as listed by Underwriters Laboratories in their Product Directory. The list also contains product distributors. The American Gas Association does not endorse nor recommend any brand of gas detector. Consumers who decide to purchase gas detectors are encouraged to look for the "UL" listing symbol.*
