Case Study: Swiss Valley Farm Project

Overview

Location

Swiss Valley Farms
Warsaw, NY
1060 milking cows, 210 dry
cows, and 570 heifers.

Existing digester built in 2009 using Plug Flow technology from GHD, Inc. (now DVO, Inc.) to produce 300 kW electrical generation.

40,000 MMBtu of RNG annually to be transported to gas grid injection point with Empire Pipeline which is 28 miles away from the farm.
