

Richard Meyer

Vice President, Energy Analysis, Markets, and Standards

Richard Meyer serves as a Vice President of Energy Markets, Analysis, and Standards at the American Gas Association (AGA), which represents more than 200 local energy companies that deliver natural gas throughout the United States.

Richard is responsible for overseeing AGA's energy markets, analysis, and codes and standards activities that support the association's outreach to advance awareness of the vital role that natural gas utilities serve in meeting the needs of a clean energy economy.

In his tenth year at AGA, Mr. Meyer's work relates to natural gas supply and demand fundamentals, gas end-use economics, greenhouse gas emissions including methane topics, climate change policy, renewable gases, energy efficiency, and distributed generation technologies like combined heat and power, reliability and resilience, and innovation including advanced gas production and end-use technologies.

Before AGA, Mr. Meyer was a Senior Associate with ICF International in its Fuels and Technology group. He worked on a range of natural gas and propane market modeling, analyses, and climate-related projects. He has an M.A. in Global Environmental Politics from American University and an M.S. in Physics from California Polytechnic State University in San Luis Obispo, California.

Richard serves on the Business Council for Sustainable Energy Board of Directors, the Energy Advisory Board of the American Council for Capital Formation, the Council of the National Capital Area Chapter of the United States Association of Energy Economics, and is a member of the Economic Club of Washington DC Emerging Leader Program.

Richard and his wife Samantha, with their son Rex, live in Washington, D.C.
