

Representing America's Natural Gas Utilities

Financial and Operational Information Series

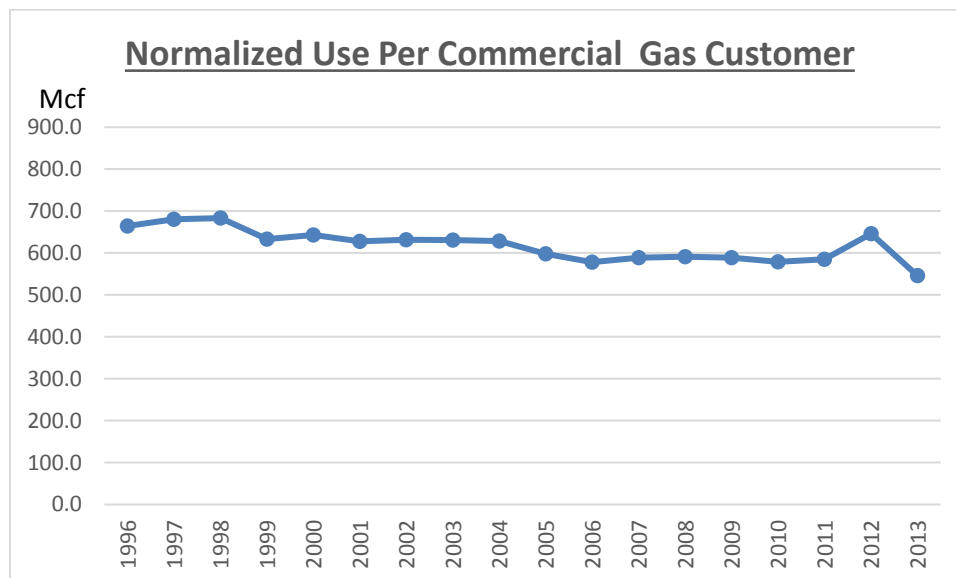

Volume 2016-7, July 2016

ISSUE:

NORMALIZED NATURAL GAS USE PER COMMERCIAL CUSTOMER

Findings

- Over the past 17 years use per commercial natural gas customer has declined 22 percent;
- Until recently this decline was gradual;
- However, for 2012 and 2013 a departure from the steady decline was noted;
- These later years may reflect greater economic volatility or may just be simply outliers; and,
- Once the weather impacts are removed (normalization), the remaining decline shows overall market energy efficiency gains.
