**Footnotes:**

(please type any footnotes in cell D22 above, and on that line only. limit of 255 characters.)

*please type any footnotes in cell D22 above, and on that line only. limit of 255 characters.*

**Question of the Quarter:**

On a weather-normalized basis, how did your estimated residential throughput this past winter (roughly October 2013 – March 2014) compare to the meter reads?

Did you over/under estimate?  

By approximately how much?  

Individual responses will be kept confidential, but the anonymous summary report of aggregated responses developed from this information will be available for benchmarking, education, advocacy etc.

**INSTRUCTIONS:**

**Bill Computations**

Amounts entered in the shaded areas under “Billed” should reflect how much a customer using those number of therms would be billed. Bills are to include all charges and should reflect the actual monthly bills that customers receive. Bill computations should encompass all sales and revenue-related taxes, all fees and regulatory assessments, all special charges and surcharges, as well as the normal cost of gas and cost of service components. If necessary, a weighted average of an estimate the weighted average tax rate(s) should be used. Any and all charges that are added to the customer’s bill should be included in the calculation. If charges vary within a jurisdiction and rate class, please enter the amount that would apply to most of your customers.

**Commodity cost of gas**

Please put in cell B22 your estimate for the percentage of the 100 residential therm bill (cell B16) that is attributable to the commodity cost of gas. That percentage should reflect delivered cost to the citygate.

**Footnotes and Commentary**

The footnotes section for the report will be used to flag any and all comments that survey participants wish to have included in the report. Of particular importance are the taxes and other governmental charges and assessments.

**Question of the Quarter:**

This inquiry will change from quarter to quarter, and will address issues identified by members as important. Summaries of the responses will be provided in a follow-up e-mail, and not in the Bill Comparison Report tables. The responses to this question may be shared with non-participants as part of AGA's advocacy efforts.
