^aSee glossary for definition of degree day. Division heating degree days are the weighted average of all states in a region, according to the number of home heating customers. National heating degree days are the weighted average of all divisions, according to the number of home heating customers.

^bHeating season is the period of November through March.

^cThe transference of many weather stations between city locations and nearby airports at some time during the 30-year period has led to the introduction of slight inconsistencies in the average data.
