

<b>TR Number</b>	<b>24-17</b>
<b>Primary Reference</b>	192.9
<b>Secondary Reference</b>	various
<b>Purpose</b>	To review and revise GM to address changes from Amdt 192-130 ( <u>RMV Valve Rule</u> ), 131 ( <u>192.8 - Petition for Reconsideration</u> ), 132 ( <u>Transmission Repair Criteria</u> ), 132 ( <u>Transmission Repair Improvements &amp; Related Amendments</u> ), 133 ( <u>Transmission Repair Technical Corrections</u> ), and 134 ( <u>RMV Valve Rule Technical Corrections</u> ).
<b>Origin/Rationale</b>	There have been a number of additional amendments to code since the gathering line regulations became effective. While many of the TR's that resulted from these amendments addressed gathering lines, this TR is to ensure that gathering line requirements were correctly identified.
<b>Assigned to</b>	OMOQ

**Note:** Revisions are shown in **yellow highlight** and **red font**.

## Section 192.8

### 1 DEFINITION ...

### 2 TYPE OF GATHERING LINE

...

#### 2.3 Type C gathering line.

- (a) A Type C gathering line has an outer diameter equal to or greater than 8.625 inches and is located in a Class 1 location to which either of the following conditions apply.
  - (1) A non-metallic line (e.g., plastic, composite pipe) where the MAOP is greater than 125 psig.
  - (2) A steel line where the MAOP is equal to or greater than 20% SMYS.
  - (3) A steel line with an unknown stress level and the MAOP is greater than 125 psig.
- (b) Type C gathering lines are subject to the requirements of §192.9(e).
- (c) An alternative method to determine the MAOP of a Type C gathering line is provided in §192.8(c)(4). Operators of Type C gathering lines with an outside diameter greater than 12.75 inches must comply with §192.9(e)(2)(ii) to establish MAOP for use outside of segment identification, unless the exceptions are met in §192.9(f).

...

## Section 192.13

*This guide material is under review following Amendment 192-132. [see TR 22-56]*

*Note: Operators of Part 192 regulated onshore gathering lines are not required to develop or follow the management of change (MOC) process described in §192.13(d), but operators might consider the benefits of MOC.*

...

## [LB notes for §192.465:

- 1) TR 22-60 is approved to Public Review and will remove the GM note stating the guide material is under review following Amdt. 192-132 as shown below in green font.
- 2) TR 22-07 is approved to Public Review and will add the Note shown in green font below. This TR 24-17 was approved to Editorial Section with the following Note instead of the Note that was approved in TR 22-07:

Note: Operators of Part 192 regulated onshore gathering lines are specifically exempted in §192.9(c), (d), and (e) from following the extra steps for monitoring and remediation external corrosion found in §192.465(d) and (f), but operators might consider the benefits of developing a remedial action plan with associated deadlines and investigating non-systemic or systemic causes of inadequate cathodic protection.

Two notes have been submitted to Editorial Section. Since the TR 22-07 Note is already approved to Public Review, Editorial Section accepts that note and adds parts of the newly proposed note in TR 24-17 to the TR 22-07 Note as shown in red underlined font below for review under this letter ballot. Letter ballot votes and comments are needed to determine the path forward for the Note.]

## Section 192.465

~~This guide material is under review following Amendment 192-132.~~

Note: Operators of Type A, Type B, and Type C gathering lines are exempt from following the extra steps for monitoring and remediation of external corrosion found in the requirements of §192.465(d) and §192.465(f) (see §192.9(c), (d) and (e)). Operators of these lines should consider the remediation guidance, and might consider the benefits of developing a remedial action plan with associated deadlines and investigating non-systemic or systemic causes of inadequate cathodic protection.

...

## Section 192.473

*This guide material is under review following Amendment 192-132. [see TR 22-59]*

Note: Operators of Part 192 regulated gathering lines are specifically exempted from §192.473(c) in §192.9(c), (d), and (e). They are not required to conduct an interference survey, analyze the results, or create remedial action plans for additional external corrosion controls; however, they might consider the benefits of these additional controls.

...

## Section 192.485

Note: Operators of Part 192 regulated gathering lines are specifically exempted from following §192.485(c) in §192.9(c), (d), and (e), but might consider the benefits of calculating the remaining strength of pipe based on the actual remaining wall thickness.

...

**[LB notes for §192.634:**

- 1) TR 22-35 was approved by Public Review and will remove the GM note stating the guide material is under review following Amdt. 192-130 as shown below in green font.
- 2) TR 22-07 is approved to Public Review and will add the Note shown in green font below. This TR 24-17 was approved to Editorial Section with the following Note instead of the Note that was approved in TR 22-07:

Note: Operators of Part 192 regulated gathering lines are specifically exempted from following §192.634, but might consider the benefits of rupture mitigation valves.

Two notes have been submitted to Editorial Section. Since the TR 22-07 Note is already approved to Public Review, Editorial Section accepts that note and adds part of the newly proposed note in TR 24-17 to the end of the TR 22-07 Note as shown in red underlined font below for review under this letter ballot. Letter ballot votes and comments are needed to determine the path forward for the Note.]

**Section 192.634**

~~This guide material is under review following Amendment 192-130.~~

Note: Operators of Part 192 regulated gathering lines are not required to comply with this section (§192.9(d) and (e)), but might consider the benefits of rupture mitigation valves.

...

**[LB notes for §192.635:**

- 1) TR 22-36 was approved by Public Review and will remove the GM note stating the guide material is under review following Amdt. 192-130 as shown below in green font.
- 2) TR 22-07 is approved to Public Review and will add the Note shown in green font below. This TR 24-17 was approved to Editorial Section with the following Note instead of the Note that was approved in TR 22-07:

Note: Operators of Part 192 regulated gathering lines are specifically exempted from following §192.635, but might consider the benefits of notification of potential rupture.

Two notes have been submitted to Editorial Section. Since the TR 22-07 Note is already approved to Public Review, Editorial Section accepts that note and adds part of the newly proposed note in TR 24-17 to the end of the TR 22-07 Note as shown in red underlined font below for review under this letter ballot. Letter ballot votes and comments are needed to determine the path forward for the Note.]

**Section 192.635**

~~This guide material is under review following Amendment 192-130.~~

Note: Operators of Part 192 regulated gathering lines are not required to comply with this section (§192.9(d) and (e)), but might consider the benefits of notification of potential rupture.

...

**[LB notes for §192.636:**

*TR 22-07 is approved to Public Review and will add the Note shown in green font below. This TR 24-17 was approved to Editorial Section with the following Note instead of the Note that was approved in TR 22-07:*

*Note: Operators of Part 192 regulated gathering lines are specifically exempted from following §192.636, but might consider the benefits of rupture mitigation valves.*

*Two notes have been submitted to Editorial Section. Since the TR 22-07 Note is already approved to Public Review, Editorial Section accepts that note and adds part of the newly proposed note in TR 24-17 to the end of the TR 22-07 Note as shown in red underlined font below for review under this letter ballot. Letter ballot votes and comments are needed to determine the path forward for the Note.]*

**Section 192.636**

*This guide material is under review following Amendment 192-130. [see TR 22-37]*

*Note: Operators of Part 192 regulated gathering lines are not required to comply with this section (§192.9(d) and (e)). but might consider the benefits of rupture mitigation valves.*
